

How did this h(app)en?

An evolving research journey

Dr Lisa McCann

Senior Lecturer in Digital Health & Care

Department of Computer and Information Sciences

University of Strathclyde, Glasgow, Scotland

Introduction to the University of Strathclyde

A leading international technological university, inspired by its founding mission as a 'place of useful learning', that makes a positive difference to its students, its community and to societies worldwide.

To reach outside the University to make the world better educated, prosperous, healthy, fair and secure.

A photograph of a wall with the phrase "A place of useful learning" written in colorful, hand-painted letters. The word "A" is blue, "place" is red, "of" is yellow, "useful" is blue, and "learning" is green. The background shows a blurred view of a building window.

A place of useful learning

University of Strathclyde

- 3rd largest university in Scotland
- Founded in 1796 by Professor John Anderson, educational reformer
- The Place of Useful learning – *“Not knowledge for knowledge sake. We must make a difference and benefit mankind.”*
- Leading international technological university differentiated by:
 - the quality of our graduates
 - the quality of our research
 - our interaction with industry
- £350m campus development over 10 years
- Global community of around 144,000 alumni

Our Vision, Mission and Values

Our Vision

A leading international technological university, inspired by its founding mission, that makes a positive difference to the lives of its students, to society and to the world

Our Mission

From our foundation as a 'place of useful learning', we take it as our responsibility to research, teach and be of benefit to society – to reach outside the University to make the world better educated, prosperous, healthy, fair and secure

Our Values

People-
oriented

Bold

Innovative

Collaborative

Ambitious

Why Research?

The more that you read,
the more things you will know.
The more that you learn,
the more places you'll go.
-- Dr. Seuss

Our strategic themes

- Advanced manufacturing & materials
- Energy
- Health & wellbeing
- Ocean, air & space
- Innovation & entrepreneurship
- Measurement science & enabling technologies
- Society & policy

Sub Themes

Better Medicines

Biomedical Imaging and Biophysics

Bio-nanotechnology and Sensors

Digital Health and Health Analytics

Health Interventions and Population Health

Living Well, Ageing Well

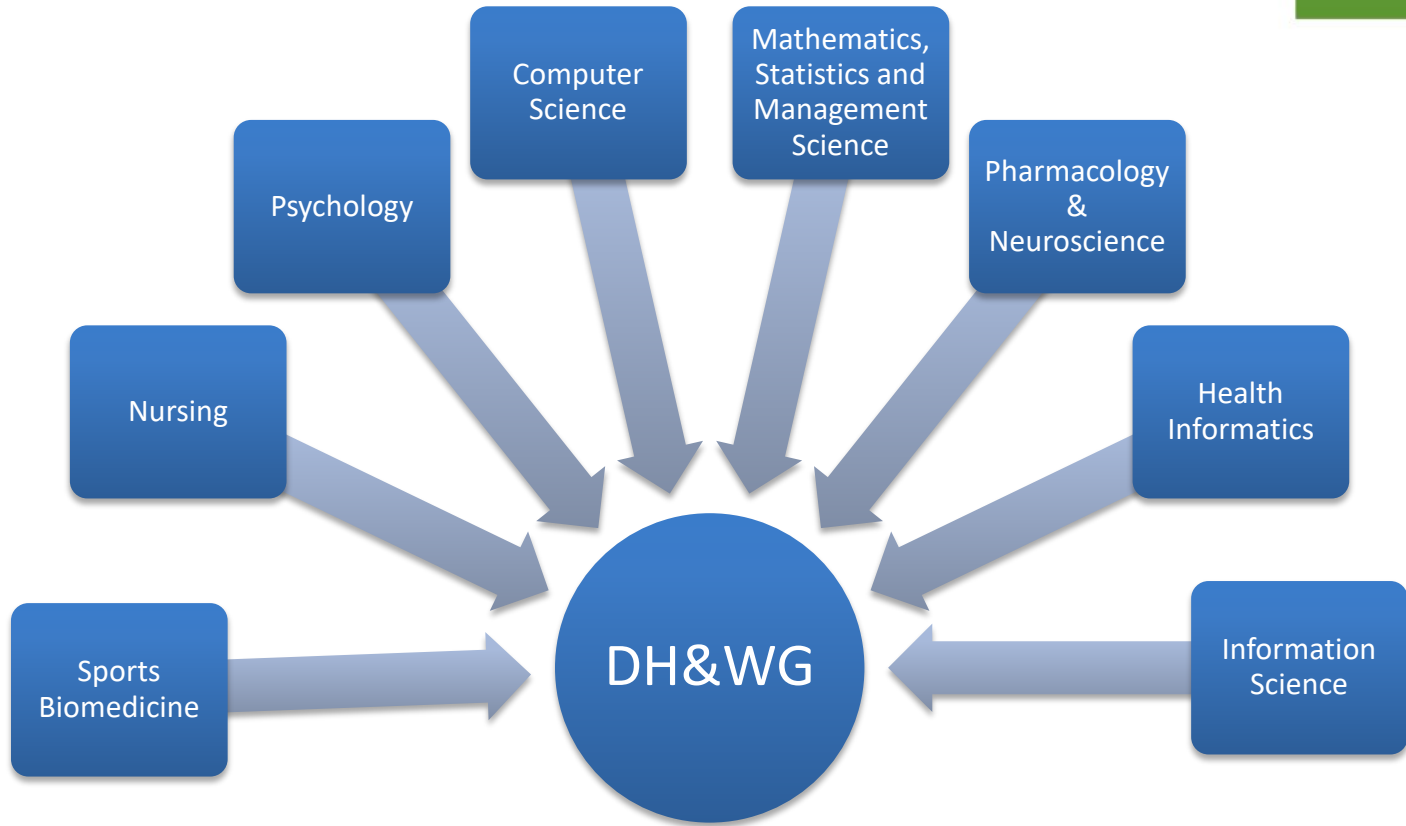

Medical Devices and Technologies

Rehabilitation

Health and Wellbeing

- Research and expertise covering the **full lifespan**
- Examining biological, social, physical and mental health
- Looking at **individuals, communities,** and structures and **systems** around health and care
- Understanding and promoting **what keeps us well**
- Detecting risk earlier and **intervening at the right time** in the right ways
- Using **data and knowledge** to understand cohorts

HEALTH AND WELLBEING STRATEGIC THEME

Digital Health and Wellness Research Group (DHaWG)

VISION/MISSION STATEMENT

‘Developing person-centred and accessible digital health solutions that make a difference’

We are a world leading digital health and wellness group that designs, develops, implements and evaluates accessible real world health solutions. We are driven by user-centred design and work in partnership with key stakeholders to create smart and connected digital health technologies that have a positive impact on individuals, communities and organisations at scale.

Understanding Patient and Service needs

e.g. service mapping, UCD, co-design

Consumer wellness

e.g. wearables, apps, tracking and monitoring

Health and Social Care Technologies and systems

e.g. PHRs, clinical decision support, remote monitoring, telehealth

Understanding Data

Analytics, machine learning, ethics, governance, personalisation

PhD Studentship Opportunities @ Strathclyde

<https://www.strath.ac.uk/studywithus/scholarships/>

<https://www.strath.ac.uk/studywithus/postgraduateresearchopportunities/>

<https://ben.mis.strath.ac.uk/pguserprofile/control/enterDetailsPage>

- £4,327 fees per year for home/EU students
- 51 posts currently available for EU fee status students (funded studentships)
- Funding usually covers fees and annual stipend of approx. £15k per annum for 42 months (3.5 years)

Doctoral Training Centres at Strathclyde

<https://www.strath.ac.uk/dtcs/>

- Centres for Doctoral Training provide supportive 4-year programmes which integrate world class research teams with pioneering external partnerships in an interdisciplinary environment.
- By increasing the proportion of our postgraduate research students studying within Doctoral Training Centre environments (internally and externally funded), we continue to provide an innovative and engaging student experience for researchers at Strathclyde
- Digital Health Implementation & Analytics Doctoral Training Centre
- Funded PhD studentships

Welcome

We're a leading, international technological university located in the heart of Glasgow, Scotland's biggest city. We believe in useful learning, which guides our research, our learning and teaching and the way we work with businesses and organisations.

We have a long history of welcoming student from Finland both on exchange and for full undergraduate and postgraduate courses.

At the moment we have approximately 50 Finnish students at Strathclyde studying across all four faculties but we'd love to see more of you here.

We welcome applications from well qualified students.

Nordic Society

The [Nordic Society](#) is open to all Nordics and Nordic-minded people. Its aim is to connect people across nationalities and cultures, and to help full-time and exchange students make friends while abroad.

The society meets roughly once every two weeks somewhere in the city centre to get together for social activities. The society has arranged events such as pub and sub crawls, dinner parties, and joint activities with other societies (eg Strathclyde International Society and Glasgow Uni Nordic Society).

You can also find the society on [Facebook](#).

Entry requirements

Undergraduate

We recognise a wide range of European qualifications, including the Ylioppilastutkintodistustus/Studentexamensbetyg and the International Baccalaureate.

For some degree programmes, we may expect you to have studied specific subjects within the Ylioppilastutkintodistustus/Studentexamensbetyg. For example, where we ask applicants taking Scottish Qualifications Authority (SQA) Highers for a specific subject(s), we may ask you for the same subject(s).

For entry with the Ylioppilastutkintodistustus/Studentexamensbetyg we require a grade of between 4-6.

Postgraduate

Kandidaatti 2/3 or 3/5.

For further information on entry requirements, please contact our representative Ciorstan MacGregor (c.macgregor@strath.ac.uk).

Researcher Development Programme (RDP)

- enhance your research activities at Strathclyde
- build your confidence by developing research-related and transferable skills
- identify and plan your own personal training package
- help fulfil your potential and succeed in a highly competitive employment market

https://www.strath.ac.uk/media/cross-functional/rdp/documents/RDP_Brochure_2018_FINAL.pdf.pagespeed.ce.swL2wNtXyY.pdf

Researcher Development Programme

User Based Research

Including people in the full system design, development and evaluation lifecycle

Who?

Dr Lisa McCann
Senior Lecturer in Digital Health & Care
lisa.mccann@strath.ac.uk
@Lisa_McCann_

What?

Health Services Researcher
Qualitative, RCTs, Mixed Methods, Evaluation
Patient experience
Co-Design / Collaborative Methods

Where?

Department of Computer and Information Sciences (LT13:04)

The eSMART Study @eSMART_EU

National AF and ScotCap Evaluations (AF work package lead)

What?

Development, design and evaluation of Person-Centred Digital Health interventions

The Prince & Princess of Wales Hospice

VR environments for young men with DMD

Digital Support for young people experiencing bereavement

The development of an e-Prehabilitation system of care to support young adults diagnosed with cancer

Adapting the Advanced Symptom Management System (ASyMS) to record patient symptoms and improve care following surgery for colorectal cancer

“ .. design should begin by identifying a human or societal need--a problem worth solving--and then fulfill that need by tailoring technology to the specific, relevant human factors. ”

Kim Vicente

www.interaction-design.org

- Close monitoring of chemotherapy toxicity is important.
- Close monitoring can ensure prompt symptom management, quality care, maximum treatment benefit, and improved patient outcomes.
- Patient-reported outcome (PRO) measures can play a key role.

Randomised controlled trial to evaluate **e**lectronic
Symptom **M**anagement using the Advanced Symptom
Management System (ASyMS) **R**emote **T**echnology for
patients with cancers: **eSMART**

Funded by EU FP7 Grant

Using Virtual Reality to support Young People with complex health care needs

- **VR to support transition from child to adult care services**
 - Created VR replica of new Hospice bedroom to increase familiarity prior to move.
 - Longer term: Create more Hospice surroundings in VR & assess reductions in anxiety associated to moving to new care environments via VR exposure.
- **VR to create environment enriched experiences for wheelchair users**
 - Created VR forest walk & adventure including ladder climb to a tree house.
 - Longer term: Build more interactive components and additional environments.
- **User needs and user requirements central to development & usability evaluations**
 - Wheelchair users
 - Breathing apparatus
 - Muscle wasting illness – headset weight, alternative controllers
 - Walking height perspective v wheelchair height perspective

“Always
